Version 1.3.0, 2007-12-12

- Blackout while moving no longer activated by zoom angle changes
- Shutter now closes completely before opening pulses
- CMY blackout during reset implemented
- Blackout while moving implemented during indexing of animation wheel.

In UTILITY menu:

- When adjusting dimmer in ADJ menu, strobe no longer continues after scrolling past ST F
- Fixture now ignores DMX when in ADJ menu
- CMY calibration ranges in CAL menu reduced to avoid excessive travel
- Zoom speed during test sequence reduced to avoid zoom and focus collision
- Fixture now displays COLD and DMX disabled when ambient temp. below -20° C (-4° F)
- DMX lamp on delayed for first 10 seconds after DMX signal received
- Gobo wheel speed control added to effect speed channel
- On-the-fly feedback removed from zoom and focus
- RGER (rotating gobo error) bugfix.
